

THE WORLD OVER

FEDERAL GRANT OF \$600,000
FOR ROAD LINKS IN ALBERTA

Federal grants for highway construction purposes will bring coast outlets all the nearer this year for Alberta tourists. At the same time, it appears that completion of these links is still some distance away.

For work on the Big Bend highway section of the Trans-Canada between Golden and Revelstoke, the dominion will spend \$400,000 this year, thus advancing work to a material extent. There is still much building to be done on the west side of the highway however, while it has been estimated that to complete the whole stretch giving a through all-Canadian route to the Pacific coast, would cost over \$2,000,000.

Work on the scenic highway between Jasper Park and Lake Louise also is being advanced this year, the dominion having decided to spend \$250,000 or \$100,000 at each end of the project. The latter is a fact, that it has been committed to this highway though it was undertaken by the previous administration, and will gradually bring it to a high level.

Of interest to Albertans was the recent announcement that it is likely the dominion will make an appropriation next year for work on a highway west of Jasper park to link with the road from Kamloops to Lake River. A new route, however, is suggested going by way of The Jean Cuche, which would serve a fishing and lumbering territory, besides having many scenic advantages.

SCRIPT PLAN IS NOW OPERATIVE IN ALBERTA

EDMONTON—Authorizing the issue of "stamped script" by the provincial government to the amount of two million dollars, the necessary order-in-council bearing the signature and approval of Hon. W.L. Walsh, lieutenant-governor, was returned to the Premier on Friday afternoon.

With the order signed, the plan is now operative in this province. It will be two or three weeks, however, before the script will be in circulation, Premier Albertan.

The order authorizes the issuing of script in denominations of \$1 and \$5. Certificates of \$1 denominations call for a one-cent stamp weekly to be affixed by the holder during a two-year period. In the case of the \$5 script a stamp, 5 cents in value, is attached weekly for a similar period, at the end of which they are redeemable by the provincial treasury.

TENNIS CHAMPIONSHIPS TO BE PLAYED AT CARBON ON JUNE 28TH AND JULY FIRST

The Championships of District No. 5 of the Alberta Lawn Tennis Association will be held on the courts of the Carbon Lawn Tennis Club on June 28th and July 1st. Five red shale courts will be used and these are in first class condition.

A large entry is expected from the following clubs: Aene, Beiseker, Bassano, Carstairs, Crossfield, Drumheller, Didsbury, Elnora, Glenora, Hesketh, Hanna, Insaifal, Munson Oaks, Rockyford, Strathmore, Swallow, Rosedale, Three Hills, Trochu and Red Deer.

The events will be Men's Singles, Women's Singles, Men's Doubles, Women's Doubles and Mixed Doubles. Consolation events will be held in the Men's and Women's Singles, if there are 16 entries in either of these, then the consolation events will be given.

Prizes will be given as first prizes in the Men's Singles, Women's Singles and Men's Doubles, and hand some first prizes in the other events. Second prizes will also be given in any of the Championships events where there are at least 12 entries.

Entries have to be made to W.A. Braisher, Carbon Alberta.

Entries close at 6 p.m., Friday, June 26th for the Singles, and at 6 p.m., Monday, June 29th for the Doubles.

The Singles events will be run on June 28th and all Doubles events on July 1st.

The entrance fee will be 50 cents per person each event. No fee in the consolation events.

The winners and runners-up in Men's Singles, R. Wise, Carbon; runner-up, A. Stevenson, Drumheller; Women's Singles, Miss M. Connolly, Drumheller; runner-up, Miss I. Goldie, Crossfield; Men's Doubles, S. Jackson and E. Kell, Drumheller; runner-up, N. Nash and E. Wise, Carbon; Women's Doubles, Miss L. Lannon and M. Connolly, Drumheller; runner-up, Miss D. and H. Colman, Three Hills; Mixed Doubles, A. Stevenson and Miss M. Connolly, Drumheller; runner-up, N. Nash, Carbon and Miss Goldie, Crossfield; Men's Secondary, O. Kirk, Trochu; Women's Secondary, Miss L. Lannon, Drumheller; runner-up, Miss D. Colman, Three Hills.

the town and dropped a big, healthy young daughter at the home of Mr. and Mrs. Birch.

A young girl from Aene had the misfortune to break her arm in one of the races on sports day.

B. Shields was River, and Alex Reid secretary of the Village in 1921.

USE OF SCRIPT ON ROAD WORK TO BEGIN SOON

Edmonton—Plans for using "Alberta property certificates," authorized by an order-in-council, as a medium of exchange for services rendered in highway construction work will get under way immediately. Hon. W. A. Fallow minister of public works, announced last week.

Approximately 10,000 additional men will be employed as soon as possible on various projects throughout the province, the minister said. They will be put to work regardless of whether the certificates are ready for distribution, he stated. "There are hundreds of small work projects in various parts of the province ready to start and we will get busy with these right away, the minister stated.

SUMMARY OF CROPS IN THE CARBON DISTRICT

The following brief summary of the crop situation the district may be of interest to our outside readers who have farming interests here.

At the time of writing the new grain has made rapid growth since seeding operations and with an abundance of moisture and ideal weather crops are almost at normal in spite of the very late spring. Much of the new wheat is now from ten to fourteen inches high and with heavy rain during the past week prospects were never better for a tremendous yield this fall.

Grasshoppers will do some damage to the new grain, but the rains have helped to keep the pest down and the farmers have been poisoning in the hope of bringing the hoppers under control. It is still too early to estimate damage from this source, but from all appearances it will be light.

The heavy frosts of last year set back the old patch of grain in the low lands, but the damage is negligible.

Taking conditions as a whole, the Carbon district is well favored this spring and a continuance of weather with a good deal of hail will see one of the largest crops this fall ever harvested in the district.

LETTERS TO THE EDITOR

Editor Carbon Chronicle,
Dear Sir:

Will you please insert this copy of a letter sent to the Village Council of Carbon:

Dear Sir:

Here is a splendid opportunity to help the citizens of Carbon. Just at present there is considerable trouble with the raising of cows having no pasture for them.

I passed over the island the other day and saw no less than three cows tethered out in the boiling sun, no shade, victims of mosquitoes, flies and every other pest.

All this time you have a splendid piece of pasture known as the stampee grounds, belonging to the Kae Hill Coal Co.

I believe that present no one has hired so why not let it for the Village for say the value of the taxes. By making a small charge for every cow pastured there I am sure that you could soon make up this value of the taxes in this way.

Kindly insert an answer to this through your local paper, The Carbon Chronicle.

I remain,
Yours truly,
MRS. R. REED.

SPEED KING THROUGH:
BUT KEEPS BLUEHIDE

LONDON—Sir Malcolm Campbell, automobile speed king has given up racing for good but he's not going to part with his famed "Bluebird."

"I've got the Bluebird right here in my home and I don't intend to let it go," the iron-nerved Brit asserted.

GOOD PRIZES ARE OFFERED TO PARTICIPANTS IN THE CARBON STAMPEE JULY 1

The posters have been printed for the Carbon Stampee, which is to be held on July 1st this year, and they are now being distributed.

Prizes for the Stampee events are as follows:

Bronze Riding with saddle, 1st, \$35; 2nd, \$15.
Bare Back Horse Riding, 1st, \$10; 2nd, \$5; 3rd, \$2.
Steeple Chasing, 1st, \$7; 2nd, \$3.
Wild Cow Milking, 1st, \$7; 2nd, \$3.
Calf Roping, 1st, \$5; 2nd, \$3.
Belay Race, 1st, \$5; 2nd, \$3; 3rd, \$1.
Barrel Race, 1st, \$5; 2nd, \$3; 3rd, \$1.
Shetland Pony Race, 1st, \$3; 2nd, \$2; 3rd, \$1.
Free-For-All Race, 1st, \$10; 2nd, \$5; 3rd, \$2.
Chuck Wagon Race, 1st, \$10; 2nd, \$5.
Added to this is a special prize of \$15 donated by C. H. Nash, making the prizes \$20 and \$10.

Best Bucking Horse, a special prize of \$15 donated by C. H. Nash, making the prizes \$20 and \$10.

There must be three contestants in each event to qualify for prizes.

There will be midway attractions and carnival booths on the grounds and in the evening ball games will be played.

As a special attraction Percy Edwards is arranging to have an aeroplane here for the day.

A big dance will be held in the evening at the home of Mrs. H. Nash, and the admission to this is 75c per couple, extra lady, 25c.

Plan to spend July 1st at Carbon to spite of counter attractions, you are assured of a good time and your money's worth. Many prominent riders are expected to be present.

Buy your ticket now to Carbon's Stampee. On all tickets sold prior to June 30th holders will be eligible to partake in the drawing of the ticket entitling them to a \$15 prize or its equivalent in cash.

The Carbon Stampee committee consists of H. M. McNaughton, president; C. B. Guy, vice-president; and J. A. Hudson, stampee manager. S. F. Torrance is the secretary-treasurer.

AVONDALE REPORTER DOESN'T LIKE CARBON BALL ROOTING TACTICS

New reporter on the job. The other one got too noisy to be a news gatherer. Believe it or not.

H. Simmons of Red Deer spent a few days in this district.

Granger won its fifth successive baseball game by defeating Carbon 9-1.

Swallow drew with Granger to a 7-7 tie on Friday night.

THE UMPIRE (by our reporter)
In Big League baseball games the umpire is paid a wage to be "square."

In our local games the umpire receives nothing but "boobies," "throw him off the field," especially by one certain team—Carbon. The Carbon players and fans who "razed" the umpire Bert Balbridge on some of his close decisions should be ashamed of themselves. It not only shows people as being illiterate, but ignorant. What kind of an umpire would one of this kind make—simply one that would be thrown off the diamond for lack of knowledge.

Bert Balbridge has umpired most home games and the visiting teams have been so perfectly satisfied with his decisions that they have asked him to umpire Granger's return game. Is this not proof of the man's ability to umpire a game fair and square? Surely Carbon is not going to resent to such poor sportsmanship!

If they are I'd advise them to disorganize—forever.

Crops in the district are showing wonderful progress.

Granger baseball team played at Bircham this week end, but the expected excitement was lacking and the Grangers team won 20-3.

W. Remper has sold his model T at a good profit.

Rosedale ball team will play at Granger on Sunday, June 21st, at 2 p.m.

Buy Your Needs in Carbon!

FORM BASEBALL CLUB

Carbon will probably have a few baseball games this year, it was indicated at a meeting of enthusiasts, which was held in the Municipal office on Monday night of this week.

Treasurer, P. Edwards, Secretary George Watt.

Norman Nash and George Watt were appointed as a finance committee, while O. Pimm, Otto Schiele and Bruce Ramsay were entrusted with the recruiting of the old ball suits.

George Disher was elected coach; H. Brown, manager; and George Watt captain.

Anyone wishing to try out for the team is asked to attend practices.

CARBON TEAM WINS THEIR FIRST BASEBALL GAME

The Carbon baseball team played a Swallow on Tuesday, June 16 and emerged victors by a 3-1 score. The game was very close and the victory was in doubt until the last man was out.

Norman Nash went into the lead in the first half of the ninth inning when Dean Twist crossed the plate. Swallow tied the score in the last half of the sixth and the next two innings were scoreless. In the first half of the ninth George Watt and B. Matherling, Norman Nash went up to bat with two men on bases and singled. The short stop made an over throw at the home plate and both Matherling and Watt scored runs.

In the last half of the ninth Matherling made short work of the Swallow batters.

Line-ups were as follows:
Swallow—L. Hunter, F. Lamble, C. Bearie, B. Schorpe, A. Gore, J. Longstaff, W. Fyten, J. Peters.

Carbon—G. Watt, B. Matherling, N. Nash, D. Twist, B. Ramsay, O. Pimm, H. Fuller, H. Woods and W. Skerry.

After the match the players of the Trochu and Carbon teams were rewarded at the home of Mr. and Mrs. C. H. Nash, and afternoon tea was served.

CARBON TENNIS PLAYERS WIN RETURN MATCH FROM THE TROCHU TENNIS CLUB

The return match between the Trochu and Carbon Lawn Tennis Clubs was played on the courts of the Carbon club on June 14th. The full schedule of nine matches was played and in addition two Singles events between juvenile members, making 11 in all.

Most of the matches were closely contested, victory finally resting with the Carbon Lawn Tennis Club by seven sets to four.

The following are the results and scores:

Men's Singles—A. Birch, Carbon, defeated H. M. Borge, Trochu, 6-1, 6-2; J. Spence, Carbon, defeated R. Murray Trochu, 6-5, 6-2.

Men's Doubles—A. Birch and N. Nash, Carbon, defeated C. Ritz and J. Lenny, Carbon, 6-2, 6-3; J. Spence and J. Lenny, Carbon, defeated C. Ritz and J. Lenny, Carbon, 6-2, 6-3.

Mixed Doubles—J. Spence and Miss A. Lenny, Carbon, defeated E. M. Borge and Mrs. Borge, Trochu, 6-2, 5-6, 6-3.

Men's Junior Singles—C. Ritz, Trochu, defeated J. Foxon, Carbon, 6-4, 6-6, 6-4.

Ladies' Junior Singles—Miss H. Matherling, Trochu, defeated M. McQuade, Carbon, 6-1, 6-1.

Boys' Singles—G. Kiesel, Trochu, defeated D. Williamson, Carbon, 6-3, 6-1; J. Lenny, Carbon, defeated J. Davis, Trochu, 1-6, 6-5, 6-4.

After the match the players of the Trochu and Carbon teams were rewarded at the home of Mr. and Mrs. C. H. Nash, and afternoon tea was served.

Firestone Wins Again at the Indianapolis Speedway for the 17th Consecutive Year

Lack Of Purchasing Power

One often hears the comment that the prosperity of the cities and towns is dependent upon the prosperity of the farmers, but little is heard of its corollary, namely that the well being of the farmer hinges upon the prosperity of the urban centres, though the one is unquestionably as true as the other.

Possibly the latter has not been heard so frequently in Western Canada as the former because, until very recent times, the farmer's income has been largely derived from an exportable surplus of grain. Under such circumstances the consumer of the bulk of Western Canadian farm products was geographically remote and the fact that the affluence or otherwise of the consumer was of considerable import was but dimly perceived, if recognized at all.

However, this relationship between the Western Canadian producer and the consumer of his products has undergone a change in the past few years and indications are not lacking that the change may be even more accentuated in the next few years.

In the first place, during the past half dozen or so of depression years a substantial percentage of Western Canadian farmers have had little or no income to boast about. Because of a succession of dry years many of them had no crops to sell and others who reaped some wheat or other grains have not received sufficient price to render their work remunerative, partly because of the closing of former markets and partly because of the existence of a big carryover which could not be liquidated, except at tremendous loss.

As a result of their predicament many farmers, even with conditions somewhat more propitious, have reduced their acreages needed to raise grains and are endeavoring to increase their output of other products, including livestock, some of which are finding an outlet to a limited degree in overseas markets and others are finding an outlet in the nature of or because of lack of processing facilities, must necessarily be disposed of in local centres.

In the case of those products which are exportable, it is necessary to find new markets or expand existing markets. In the case of products which must be disposed of in local markets, consumption capacity must be increased if the farmer is to be able to dispose of such commodities at a price to yield him a profitable return.

Too frequently, in the past two or three years, farmers have had the experience of hauling or shipping produce to local centres only to find themselves faced with the choice of disposing of them at ruinously low prices or of taking them home again, unsold.

The irony of the situation is that in many cases, perhaps in all of them, the produce would have been welcome in the home of the potential local consumers but, because of conditions which made it necessary for the farmer to raise such produce, these people were unable to buy it, or only at such prices as to render the transaction unprofitable to the producer. In other words, the trouble was lack of purchasing power.

There is no question that local markets are capable of consuming a great deal more local produce if the consumer had the necessary purchasing power and this brings us back to the original statement that the well being of the farmer is dependent upon the prosperity of the urban centres and, so far as Western Canada is concerned, this is much more true than it was a few years ago.

If new local markets can be opened up and the purchasing power of the residents of existing local markets can be increased the problem of the farmer will be at least partially solved.

Fortunately there is every reason to hope that the next few years will see the development of new local markets with the discovery of mineral wealth in the northern areas and its development, a process which is being greatly accelerated at the present time.

This, coupled with an increasing influx of tourists from other provinces and the United States giving ground for belief that new markets for local products are in the making. That the latter has real potentialities, at present principally enjoyed by Eastern Canada and British Columbia, is evidenced in the recent publication of statistics showing that more money was spent in Canada by tourists last year than was realized by the sale of Canadian export wheat.

As for the expansion of existing local markets that is, as already stated, largely a question of purchasing power and how this purchasing power is to be increased is a question which is giving rise to a great deal of thought. Can it be done by some other action or can it only be brought about by the ordinary operation of economic processes?

One quiet student of affairs, whose name has never appeared in print and perhaps never will, suggested to the writer recently that it could be brought about almost overnight if ten or a dozen of the big industrial leaders of the nation would gather around a table and agree to increase salaries and wages all round. "Merchants," he said, "give much thought to the purchase and display and sale of their commodities, but little or none to the other half of their business—the ability of the consumers to buy."

No Time For Number

Bystander—"Did you get the number of that car that knocked you down, madam?"

Victim—"No, but the husky who was driving it was a one-eyed fellow, said, lived with Gaston, and she had on a periwinkle hat, trimmed with artificial cherries."

Just wishing for things to happen never gets you anywhere.

Natives of southern China raise a great deal of rice, but seldom eat it, while peasants of northern China rarely see rice.

"Of course, my dear, she's still very handsome, but you should have seen her 10 or 15 years ago when she was five years younger."

"When a man carries a luck piece (it doesn't work unless he does."

Maintain National Credit

By Meeting Obligations To The Full Extent Of Capacity

Members of Canadian Manufacturers' Association meeting at Quebec, left appreciation to the suggestion by their president, W. E. McEwen, of Toronto, that Canada, by application of "common sense and some old-fashioned methods, should anticipate the coming years with confidence and satisfaction."

The president, in a comprehensive review of world economic conditions presented at the annual convention, noted improvement throughout the world generally during the past year.

He was optimistic of the future but with his optimism came a note of warning against too ready spending and loose borrowings by government.

"One feature in connection with the increase of public debt that is giving concern to many individuals and business men," he said, "is the increasing proportion of government obligations that is being acquired by banking institutions. It is, of course, a sound banking theory that when business and industry are depressed and banking funds are abundant, government securities form an ideal investment."

"This theory assumes that when industry and business revive and there is a greater demand on the banks for loans, the government securities can be readily disposed of to the investing public. But it is a serious implication that the amount of security so held should not be greatly in excess of the capacity of the investing public to absorb it. It also is widely felt that if our various governments had to look to insurance, loan and trust companies and private investors as the chief purchasers of their securities the increased difficulty of floating bonds would operate as a curb on borrowing."

Mr. Morden said the aim of Canada should be to maintain national credit by meeting obligations to the full extent of capacity, refunding our debt at lower rates of interest whenever opportunities occur, and reducing expenses.

Steady improvement in conditions made it appear "reasonable to hope that the world, as a whole, is gradually recovering from the great depression, which culminated the progressive economic and trade distress of the past few years, from their origin, in or were as least precipitated by, the dislocation of the war."

New Type Electric Bulb

Steam Light Latest Development In

A cigarette can be lighted in a jet of steam made by a new type of electric light bulb invented in the latest development of the General Electric Company in New York, N.Y.

Details of the new development have been made public. The "steam" light is one result of a revolutionary change in structure of electric light bulbs, made by a new art of welding metal to glass.

The steam bulb is about the size of a large house lamp. It has a bowl over its tungsten filament is a copper coil. This coil develops a jet of steam the size of a lead pencil and almost instantly after the light is switched on. A piece of paper held in the jet cuts up, smokes and turns to black ash. The steam with this burning power has a temperature of 1,100 degrees Fahrenheit.

The Only Thing Left

At a conference, we are told, Premier Mussolini stooped and picked up a handkerchief, which King Victor Emmanuel of Italy and Prince Luigi had dropped, and was profoundly thanked by the monarch. Well, His Majesty "should" have picked up about the only thing left he can stick his nose into, states the Windsor Daily Star.

Prince Rides Bicycle

When a Mongol prince, descendant of a long line of hard-boiled warriors, abandons his pony for a bicycle, it is news in the frontier settlement of Keshua, Inner Mongolia. Prince Khung, a leading Mongol dignitary, showed his compatriots recently by appearing on the main street of Keshua on a bicycle.

Forget To Forget

One of our newspaper friends says the Windsor Daily Star brings a good story of the absent-minded professor who had suddenly found himself at a dinner which he didn't want to attend. The professor rambled on something like this: "I didn't mean to attend this affair tonight. I meant to forget to come, and I forgot to forget."

Was Partly Modern

Proclamation Of Coronation Date Broadcasted To Empire

With forms and ceremonies inherited from the immemorial past, the date of the coronation of King Edward VIII. was duly proclaimed in London. But modern science and usage intruded even into medieval pageantry.

When the Earl Marshal, Duke of Norfolk, and his attendants stepped out upon the hoary walls of St. James's Palace there was immediately in front of them a microphone to carry to the ears of the kingdom at large all that was said in the King's name. The proclamation set the date of the coronation as May 12, 1937. The date was announced in a special issue of the London Gazette.

While a fanfare blared from the silver trumpets of the Horse Guards, the Garter Principal King of Arms, with white-gloved hands, unrolled a long scroll nearly a yard wide. In sonorous tones he began his reading. The King's guards of Grenadiers stood at attention, and the great crowd hushed into silence. By means of amplifiers, every sentence was heard distinctly to the farthest end of the throng. Farther away on the battlemented ivy-clad walls of the palace, scores of members of the King's personal household.

Sir Gerald read the proclamation, "Declaring His Majesty's pleasure touching his royal coronation, the solemnity thereof." The reading took nearly 10 minutes. It opened with a reference to "the love and blessing of almighty God" and spoke of "our princely care for the preservation of the lawful rights and inheritances of our loving subjects."

Big Prize For Air Race

Race From England To South Africa In September

Sir Alan Cobham announced that I. W. Schleisinger, South African millionaire, has given £10,000 (\$16,000) prize money for the proposed air race from England to South Africa to coincide with the air race exhibition at Johannesburg.

Schleisinger is promoting the race with Cobham, himself a pioneer long-distance flyer, as co-organizer. The Johannesburg exhibition opens Sept. 15 and will run until Jan. 15, 1937. The air race proposal has the approval of the British air ministry and the South African government has promised every assistance.

Entire organization of the race will be undertaken by the Royal Aero Club of Great Britain and participation will be limited to British empire pilots and aircraft. In this respect it will differ from the London-to-Melbourne race of 1934 which was open to all-comers.

Cobham said Schleisinger's motive in arranging the event was the promotion of commercial aircraft and the furtherance of air interest on the part of citizens of the British empire. But chiefly, he said, the race was intended to focus attention on the Johannesburg exhibition. Cobham added the race would start on the day with the sun distant when it will be possible to spend a weekend in Johannesburg. Possibly, he predicted, the flight will be accomplished in two days.

Feather In Your Cap

Phrase Originated From Custom That Is Almost Universal

This phrase means that something is an honor to you. The allusion is to the very general custom in Asia and among the American Indians to add a feather to the headdress for every enemy slain.

The ancient Lydians, and many others had a similar custom, and it is still usual for the English sportsman who kills the first woodcock to pluck it, feather and stick it in his cap. The custom in one form or another seems to be almost universal. In Hudson's Bay at one time none might wear a feather but he who had slain a Turk, and it was remembered that when London quelled the Talming rebellion he was honored by the Chinese government with the "yellow jacket and peacock's feather."

New Comet Found

Will Be Visible To Naked Eye Late Next Month

The new Peltier Comet, first to be found this year and first to be visible to the unaided eye since 1927, will swing into the range of vision late in July, Harvard College Observatory announced.

But 120,000,000 miles from the earth, the comet has increased its apparent brightness from ninth to eighth magnitude in four days and by the end of July, before it starts to recede, it will be brighter than Venus in magnitude and within 20 million miles.

To Have and to Hold

Men who are wedded to the practice of "rolling-their-own" honour and cherish Ogden's. They KNOW that Ogden's Fine Cut is a mighty pleasing tobacco, that it's always mild and soothing—the cigarette tobacco "to have and to hold." Now that better times are here, roll-your-owners everywhere are picking Ogden's because Ogden's is better. The package is better because it has the purple easy-opening ribbon for removing the Cellophone, "Chanteclair" or "Vogue" papers are the ideal mates for such a grand cigarette tobacco.

OGDEN'S FINE CUT

P.S.—Your Pipe knows Ogden's Cut Pipe.

SELECTED RECIPES

SHORTCAKE BISCUITS

4 cups flour
4 teaspoons Magic Baking Powder
1/2 teaspoon salt
4 tablespoons shortening (1/2 butter, 1/2 lard)
1 tablespoon sugar
Milk, sufficient to make soft dough, about 2 1/2 cups
Sift together three times flour, baking powder and salt. Cut in the shortening. Add sugar, mix well. Add milk to make soft dough. Turn on floured board. Pat or roll lightly to 1/2 inch thickness. Cut rather larger than ordinary. Bake in oven 220 degrees F. 15 to 20 minutes. When done split and spread with creamed butter. Buttermilk biscuits must be brushed and sweetened strawberries. The biscuits may be covered with whipped cream, and the juice from the fruit poured round the dish or served at the table as many people do not like the short cake biscuit soaked with juice.

A Leytonstone, Eng. confectioner constructed a cake model of Westminster Abbey. The model weighed a ton.

He: "You think more of that old wireless set than you do of me."

He: "Well, I get less interference from it."

You can't fatten a hog by feeding it occasionally, and a poor business can't be built up by advertising occasionally.

Medical service by airplane has been inaugurated in White Russia.

Famous Canadian Artist

Homey Watson Dies In His 81st Year At His Home In Ontario

Homey Watson, one of Canada's outstanding artists, died at his home near Kitchener, Ont., in his 81st year. He had been ill for several months.

In the same rural community where he died, Homey Watson was born in 1856 and began his art career without tuition of any kind. In 1880 the Marquis of Lorne purchased "The Pioneer Mill," exhibited by Watson at the Royal Canadian Academy. This painting and another of Watson's early works, "Last of the Drought," went to the private collection of Queen Victoria. Watson's fame spread and he made several trips to England, exhibiting with the famous artists of his day.

His outstanding contribution to the history of the Great War was his panoramic "Valley of the Camp," done under assignments by the Canadian government in 1914.

A train ferry will soon enable railway passengers to go from London to Paris without leaving the train.

It is estimated that a person has approximately one chance in 3,388 of being killed outright in an automobile accident.

"The women certainly are patronizing handbags nowadays."

"Yes, and it serves some of these talkative barbers right."

Moscow, Russia, has opened a theatre for the deaf and dumb.

Purity Flour—the very "flower" of the world's best wheat—uniform and dependable—rich in nourishment and flavor—for cakes, pies, flaky pastry and bread. A strong flour that goes farther.

CARBON AUTO SERVICE

ANDREW BUYER, Proprietor

TOWN & COUNTY

Mr. and Mrs. S. F. Torrance left on
Tuesday for Edmonton, where they
will spend a few days.

Mrs. C. Oliphant and Mrs. E. J.
Rouleau were Calgary visitors on
Monday.

Mr. and Mrs. Len Poxon spent Fri-
day and Saturday last week in Cal-
gary.

Mr. and Mrs. H. C. Willson were
Calgary visitors last Friday.

Mrs. Jealous, George and Gwen, of
Three Hills, were Carbon visitors on
Thursday last week.

Mrs. George Wise returned to Cal-
gary on Friday after spending the
last week visiting with relatives in
town.

Mrs. Frank Sherry and daughter,
Mary, and Harold Wise, of Calgary,
are visiting at the home of Mr. and
Mrs. Alex Reid Sr.

Herbert McGready, Mick Sherry
and the Misses Beatrice Bacon and
Lyrtle Sherry motored to Drumheller
on Saturday night.

Mr. Bruce Ramsay and the Misses
Kathleen Watkins, Michael Ramsay and
Ruby Embree motored to Calgary on
Saturday, returning the same evening.

Mr. and Mrs. W. Poxon, and Mrs.
S.N. Wright returned last week from
a trip through the Peace River coun-
try to Fairview, Alta. They report
the route in excellent condition and
crops somewhat later than around
here.

Don't forget! Next Tuesday is a
Dominion holiday, being the King's
birthday, and all places of business
will be closed. At the same time you
are asked to keep in mind that the
Grand Forks sports day is being held
on this date, June 23rd.

J. M. Macdonald, Gordon Murray,
Bill Oliphant, Percy Edwards, Charlie
Smith, Otto Schelle and Dick Gimble
went to Swallow on Tuesday night
with the ball team.

John Leiske was in Carbon last
week, taking out a load of grasshopper
bait. He says that about 300 acres
of his crop has been badly damaged
by the grasshoppers this spring.

—Sponsored by the Carbon Ladies' Aid, Mrs. Wilson, L.T.C.M. will hold
her annual musical recital in the Car-
bon United Church on Monday, June
29th, at 8:30 p.m. Admission, adults
25c; children 15c.

The finance committee of the Car-
bon baseball club made the rounds of
the Carbon business men on Tuesday
and collected over thirty dollars cash
as well as some much-needed baseball
equipment.

Carbon's numerous painters have
been at work the past few weeks and
their artistic touch seems to have de-
veloped as they got to the second
coat, for the work is pleasing. Dick

MISCELLANEOUS SHOWER

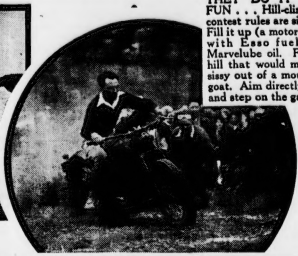

A miscellaneous shower in honor of
Miss Kathleen Watkins, bride-elect,
was held on Friday afternoon, June 12,
at the home of Mrs. Aaron Klassen,
and about 25 guests were present.
In the contest held Mrs. Rouleau won
the prize.

Miss Ruby Embree wheeled in a tea
table prettily decorated and laden
with gifts for the bride-to-be, who re-
ceived many useful gifts.
Following the displaying of the
gifts tea was served by the hostess.

CARBON STAMPEDE JULY 1

AN ESKIMO A-HUNTING GOES . .
(above) A Kyak in the Arctic Ocean.
Nowadays many Eskimos use vessels
driven by gasoline or diesel oil. Who
furnishes oil products away up in those
remote areas? Imperial Oil Limited does.

THEY DO IT FOR
FUN . . . Hill-climbing
contest rules are simple.
Fill it up (a motorcycle)
with Esso fuel and
Marvelube oil. Find a
hill that would make a
clay out of a mountain
goat. Aim directly at it
and step on the gas.

THE TRUCK GOES STREAMLINE

A modern Imperial Oil delivery
unit, just as fashionable as the
latest passenger car. Modern
equipment, modern methods and
good old-fashioned regard for
quality and value make Imperial
gasoline and oils—well, that's
why most people buy Imperial!

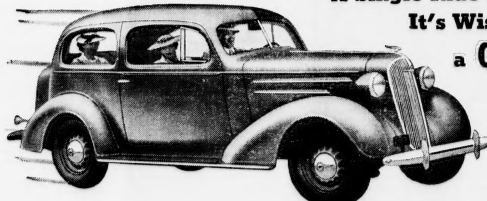

THE ONLY COMPLETE LOW-PRICED CAR

BETTER than WORDS
